Contents of Volume 66

No. 1. JANUARY 1989

Lung aeration and lung water dynamics in artificially ventilated newborn lambs
J. E. Maloney, C. Kondo, Y. Takahashi, V. Dickson, D. Grant, and W. M. Schoel 1

Muscle glycogenolysis and H^+ concentration during maximal intermittent cycling
L. L. Spriet, M. I. Lindinger, R. S. McKelvie, G. J. F. Heigenhauser, and N. L. Jones 8

Effect of exercise on the development of osteoporosis in adult rats
K. H. Myburgh, T. D. Noakes, M. Roodt, and F. S. Hough 14

Abdominal muscle use during breathing in unanesthetized dogs
A. De Troyer, J. J. Gilmartin, and V. Ninane 20

Does acute hypoxemia blunt sympathetic activity in hyperthermia?
L. B. Rowell, G. L. Brengelmann, M. V. Savage, and P. R. Freund 28

Prolonged whole-body cold water immersion: fluid and ion shifts
P. A. Deuster, D. J. Smith, B. L. Smoak, L. C. Montgomery, A. Singh, and T. J. Doubt 34

Pulmonary vascular responses to surgical chemodenervation and chemical sympathectomy in dogs
R. Naeije, P. Lejeune, M. Leeman, C. Melot, and J. Closset 42

Brain hypoxia preferentially stimulates genioglossal EMG responses to CO_2
D. A. Hutt, R. A. Parisi, T. V. Santiago, and N. H. Edelman 51

Lidocaine pharmacokinetics during water immersion in normal humans
G. Blyden, F. Silverstein, M. Epstein, P. Norsk, B. Brenner, N. Nwadike, and M. Dorvil 57

Motor unit territories supplied by primary branches of the phrenic nerve
C. G. M. Hammond, D. C. Gordon, J. T. Fisher, and F. J. R. Richmond 61

Muscle glycogen availability and temperature regulation in humans
L. Martineau and I. Jacobs 72

Distribution of pulmonary vascular pressure as a function of perinatal age in lambs
M. L. Tod and J. T. Sylvester 79

Sympathetic activation is associated with increases in EMG during fatiguing exercise
D. R. Seals and R. M. Enoka 88

Effect of pentoxiphylline on oxygen transport during hypothermia
M. B. Hershenson, J. A. Schena, P. A. Lozano, M. J. Jacobson, and R. K. Crone 96

Oxygen radicals and antioxidant enzymes alter pulmonary vascular reactivity in the rat lung
S. L. Archer, D. Peterson, D. P. Nelson, E. G. DeMaster, B. Kelly, J. W. Eaton, and E. K. Weir 102

Endotoxin-pretreated neutrophils increase pulmonary vascular permeability in dogs
C. H. Welsh, D. C. Lien, G. S. Worthen, P. M. Henson, and J. V. Weil 112

Relationship of diaphragmatic contractility to diaphragmatic blood flow in newborn lambs
D. G. Nichols, S. Howell, J. Massik, R. C. Koehler, C. A. Gleason, J. R. Buck, R. S. Fitzgerald, R. J. Traystman, and J. L. Robotham 120

Cardiorespiratory and cellular changes with interleukin 2 infusion in sheep
F. L. Glauser, D. E. Bechard, G. G. DeBlois, A. A. Fowler, R. E. Merchant, G. Jesmok, and R. P. Fairman 128

Role of costal and crural diaphragm and parasternal intercostals during coughing in cats
E. van Lunteren, R. Daniels, E. C. Deal, Jr., and M. A. Haxhiu 135

Operation Everest II: muscle energetics during maximal exhaustive exercise
H. J. Green, J. Sutton, P. Young, A. Cymerman, and C. S. Houston 142

Hemodynamic effects of arginine vasopressin in rats adapted to chronic hypoxia
H. Jin, R.-H. Yang, Y.-F. Chen, R. M. Thornton, R. M. Jackson, and S. Oparil 151

Hypothalamic-pituitary-adrenal responses to short-duration high-intensity cycle exercise
W. J. Kraemer, J. F. Patton, H. G. Knuttgen, L. J. Marchitelli, C. Cruthirds, A. Damokosh, E. Harman, P. Frykman, and J. E. Dziados 161

H_2O_2 and cGMP may function as an O_2 sensor in the pulmonary artery
T. Burke-Wolin and M. S. Wolin 167

Bronchial responsiveness and inflammation in guinea pigs exposed to acrolein
G. D. Leikauf, L. M. Leming, J. R. O'Donnell, and C. A. Doupnik 171

Oxidation of a glucose polymer during exercise: comparison with glucose and fructose
D. Massicotte, F. Péronnet, G. Brisson, K. Bakkouch, and C. Hillaire-Marcel 179

Cardiovascular failure and apnea in shock
S. Nava and F. Bellemare 184

Intensity and duration of exercise effects on skeletal muscle cAMP, phosphorylase, and glycogen
A. H. Goldfarb, J. F. Bruno, and P. J. Buckenmeyer 190

Determinants of $\dot{V}o_{2\ max}$ in rats after high-intensity sprint training
M. R. Hilty, H. Groth, R. L. Moore, and T. I. Musch 195

Distribution of bronchoconstrictor responses in isolated-perfused rat lung
N. M. Munoz, S.-W. Chang, T. M. Murphy, N. P. Stimler-Gerard, J. Blake, M. Mack, C. Irvin, N. F. Voelkel, and A. R. Leff 202

Oxygen delivery rate and sufficiency of oxygenation during ECMO in newborn baboons
J. D. Cornish, D. R. Gerstmann, D. M. Null, Jr., M. D. Smith, and T. J. Kuehl 210

Ozone-induced changes in pulmonary function and bronchial responsiveness in asthmatics
J. W. Kreit, K. B. Gross, T. B. Moore, T. J. Lorenzen, J. D'Arcy, and W. L. Eschenbacher 217

Expiratory neural activities in gasping
W. M. St. John, D. Zhou, and R. F. Fregosi 223

Epithelium removal alters responsiveness of guinea pig trachea to substance P
J. M. Fine, T. Gordon, and D. Sheppard 232

Behavioral thermoregulation in mice subjected to high pressure
A. G. Macdonald, N. R. Marshall, and R. G. Pertwee 238

Medial collateral ligament healing subsequent to different treatment regimens
M. A. Gomez, S. L.-Y. Woo, M. Inoue, D. Amiel, F. L. Harwood, and L. Kitabayashi 245

Is resting muscle oxygen uptake controlled by oxygen availability to cells?
A. E. Chinet and J. Mejsnar 253

Induction of alveolar epithelial injury by phospholipase A_2
D. E. Niewoehner, K. Rice, P. Duane, A. A. Sinha, R. Gebhard, and D. Wangensteen 261

Neurogenic plasma extravasation: inhibition by morphine in guinea pig airways in vivo
M. G. Belvisi, D. F. Rogers, and P. J. Barnes 268

Transmission of sound generated by sternal percussion
A. B. Bohadana and S. S. Kraman 273

Transmission to the chest of sound introduced at the mouth
S. S. Kraman and A. B. Bohadana 278

Immune parameters of untrained or exercise-trained rats after exhaustive exercise
M. P. Mahan and M. R. Young 282

Pulmonary clearance of radiotracers after positive end-expiratory pressure or acute lung injury
M. P. Barrowcliffe, G. D. Zanelli, and J. G. Jones 288

Acoustic rhinometry: evaluation of nasal cavity geometry by acoustic reflection
O. Hilberg, A. C. Jackson, D. L. Swift, and O. F. Pedersen 295

Interaction of inhaled LTC_4 with histamine and PGD_2 on airway caliber in asthma
G. D. Phillips and S. T. Holgate 304

Exercise alters the distribution of ammonia and lactate in blood
R. T. Harris and G. A. Dudley 313

Effect of liver glycogen content on glucose production in running rats
J. Vissing, J. L. Wallace, and H. Galbo 318

Coupling of cardiac and locomotor rhythms
R. L. Kirby, S. T. Nugent, R. W. Marlow, D. A. MacLeod, and A. E. Marble 323

Lipolytic response of fat cells to catecholamines in sedentary and exercise-trained women
D. Riviere, F. Crampes, M. Beauville, and M. Garrigues 330

Cardiovascular response to cycle exercise during and after pregnancy
S. P. Sady, M. W. Carpenter, P. D. Thompson, M. A. Sady, B. Haydon, and D. R. Coustan 336

Surfactant subtypes in mice: characterization and quantitation
N. J. Gross and K. R. Narine 342

Chest wall impedance partitioned into rib cage and diaphragm-abdominal pathways
G. M. Barnas, K. Yoshino, D. Stamenovic, Y. Kikuchi, S. H. Loring, and J. Mead 350

Impedance of the chest wall during sustained respiratory muscle contraction
G. M. Barnas, N. C. Heglund, D. Yager, K. Yoshino, S. H. Loring, and J. Mead 360

Whole-body protein metabolism in lactating and nonlactating women
K. J. Motil, C. M. Montandon, D. L. Hachey, T. W. Boutton, P. D. Klein, and C. Garza 370

Effect of various doses of cocaine on endurance capacity in rats
M. E. Bracken, D. R. Bracken, W. W. Winder, and R. K. Conlee 377

Differential responses of expiratory muscles to chemical stimuli in awake dogs
C. A. Smith, D. M. Ainsworth, K. S. Henderson, and J. A. Dempsey 384

Differential timing of respiratory muscles in response to chemical stimuli in awake dogs
C. A. Smith, D. M. Ainsworth, K. S. Henderson, and J. A. Dempsey 392

Extracellular matrix proteoglycan degradation by human alveolar macrophages and neutrophils
S. E. McGowan and R. J. Thompson 400

Calibration of respiratory inductive plethysmograph during natural breathing
M. A. Sackner, H. Watson, A. S. Belsito, D. Feinerman, M. Suarez, G. Gonzalez, F. Bizousky, and B. Krieger 410

Daily exercise enhances coronary resistance vessel sensitivity to pharmacological activation
S. E. DiCarlo, R. W. Blair, V. S. Bishop, and H. L. Stone 421

Muscle acidosis during static exercise is associated with calf vasoconstriction
L. Sinoway, S. Prophet, I. Gorman, T. Mosher, J. Shenberger, M. Dolecki, R. Briggs, and R. Zelis 429

Tumor-promoting phorbol esters inibit monocyte adherence to endothelial cells
D. W. Kamp, K. D. Bauer, D. B. Rubin, and M. M. Dunn 437

Cigarette smoke extract increases albumin flux across pulmonary endothelium in vitro
W. E. Holden, J. M. Maier, and M. R. Malinow 443

Hypoxanthine-xanthine oxidase-related defect in polypeptide chain initiation by endothelium
L. Jornot and A. F. Junod 450

Effect of leukotrienes B_4, C_4, and D_4 on segmental pulmonary vascular pressures
R. K. Albert, W. J. E. Lamm, W. R. Henderson, and R. W. Bolin 458

Effect of swim exercise training on human muscle fiber function
R. H. Fitts, D. L. Costill, and P. R. Gardetto 465

Tritiated water as a measure of body water in immature rats growing at different rates
H.-P. Sheng and R. A. Huggins 476

Intrathoracic pressures and left ventricular configuration with respiratory maneuvers
S. M. Scharf, R. Brown, K. G. Warner, and S. Khuri 481

A prototype gas exchange monitor for exercise stress testing aboard NASA Space Station
J. A. Orr, D. R. Westenskow, and A. Bauer 492

Effect of testosterone on muscle mass and muscle protein synthesis
R. C. Griggs, W. Kingston, R. F. Jozefowicz, B. E. Herr, G. Forbes, and D. Halliday 498

Adrenergic stimulation of inositol phosphate accumulation in tracheal epithelium
T. Bainbridge, R. D. Feldman, and M. J. Welsh 504

SPECIAL COMMUNICATIONS

Mouth pressure curve on abrupt interruption of airflow during forced expiration
N. Ohya, J. Huang, T. Fukunaga, and H. Toga 509

ABSTRACTS FROM CURRENT LITERATURE 518

No. 2. FEBRUARY 1989

Metabolic and functional adaptation of the diaphragm to training with resistive loads
S. R. Akabas, A. R. Bazzy, S. DiMauro, and G. G. Haddad 529

Reflex effect of esophageal distension on respiratory muscle activity and pressure
A. Oliven, M. Haxhiu, and S. G. Kelsen 536

Preferential axial flow during high-frequency oscillations: effects of gas density
C. M. Alleyne, I. D. Frantz III, and J. J. Fredberg 542

Effects of β_1- vs. $\beta_1+\beta_2$-blockade on exercise endurance and muscle metabolism in humans
J. Cleroux, P. Van Nguyen, A. W. Taylor, and F. H. H. Leenen 548

Both acute and chronic exercise enhance in vivo ethanol clearance in rats
C. M. Ardies, G. S. Morris, C. K. Erickson, and R. P. Farrar 555

Estimation of the mitochondrial redox state in human skeletal muscle during exercise
T. E. Graham and B. Saltin 561

Diaphragm metabolism during supramaximal phrenic nerve stimulation
A. Pope, S. M. Scharf, and R. Brown 567

Effect of indomethacin on allergen-induced asthmatic responses
J. G. Kirby, F. E. Hargreave, D. W. Cockcroft, and P. M. O'Byrne 578

Calcitonin and CGRP block bombesin- and substance P-induced increases in airway tone
C. Gatto, R. C. Lussky, L. W. Erickson, K. J. Berg, J. D. Wobken, and D. E. Johnson 573

Polyethylene glycol-attached antioxidant enzymes decrease pulmonary oxygen toxicity in rats
C. W. White, J. H. Jackson, A. Abuchowski, G. M. Kazo, R. F. Mimmack, E. M. Berger, B. A. Freeman, J. M. McCord, and J. E. Repine 584

Effect of dichloroacetate on lactate concentration in exercising humans
F. Carraro, S. Klein, J. I. Rosenblatt, and R. R. Wolfe 591

Involvement of ventral medullary surface in respiratory responses induced by 2,4-dinitrophenol
N. R. Prabhakar, J. Mitra, E. M. Adams, and N. S. Cherniack 598

Effects of elastase-induced emphysema on airway responsiveness to methacholine in rats
S. Bellofiore, D. H. Eidelman, P. T. Macklem, and J. G. Martin 606

Recovery of diaphragm function after laparotomy and chronic sonomicrometer implantation
P. A. Easton, J.-W. Fitting, R. Arnoux, A. Guerraty, and A. E. Grassino 613

Muscle energetics during prolonged cycling after exercise hypervolemia
H. J. Green, L. L. Jones, M. E. Houston, M. E. Ball-Burnett, and B. W. Farrance 622

Ca^{2+}-dependent facilitated shortening in isotonic contraction of trachealis muscle
R. W. Mitchell, S. M. Koenig, E. Kelly, N. L. Stephens, and A. R. Leff 632

PAF-induced contraction of canine trachea mediated by 5-hydroxytryptamine in vivo
T. M. Murphy, N. M. Munoz, J. Moss, J. S. Blake, M. M. Mack, and A. R. Leff 638

Sensitivity of methods for calculating energy expenditure by use of doubly labeled water
J. Seale, C. Miles, and C. E. Bodwell 644

Effect of hindlimb suspension on $\dot{V}O_{2\,max}$ and regional blood flow responses to exercise
J. M. Overton, C. R. Woodman, and C. M. Tipton 653

CONTENTS OF VOLUME 66

Pulmonary vascular resistance after cessation of positive end-expiratory pressure
B. P. Fuhrman, D. L. Smith-Wright, S. Venkataraman, and D. F. Howland 660

Vascular responses in forearm and calf to contralateral static exercises
D. A. Duprez, L. K. Essandoh, P. M. Vanhoutte, and J. T. Shepherd 669

Force deficit of vascularized skeletal muscle grafts in rabbits
H. W. Burton, T. R. Stevenson, T. P. White, J. Hartman, and J. A. Faulkner 675

Human breathing pattern responses to loading with increased background impedance
A. Harver and J. A. Daubenspeck 680

Internal intercostal nerve discharges in the cat: influence of chemical stimuli
R. F. Fregosi and D. Bartlett, Jr. 687

Effect of training on the dose-response relationship for insulin action in men
K. J. Mikines, B. Sonne, P. A. Farrell, B. Tronier, and H. Galbo 695

Effects of acute exercise and detraining on insulin action in trained men
K. J. Mikines, B. Sonne, B. Tronier, and H. Galbo 704

Cardiac adaptations to endurance training in rats with a chronic myocardial infarction
T. I. Musch, R. L. Moore, P. G. Smaldone, M. Riedy, and R. Zelis 712

Muscle glycogen storage postexercise: effect of mode of carbohydrate administration
M. J. Reed, J. T. Brozinick, Jr., M. C. Lee, and J. L. Ivy 720

Evaluation of the mechanism of decreased airway responsiveness in lambs
A. Stecenko, K. McNicol, and S. Polk 727

Influence of overload on recovery of rat plantaris from partial denervation
R. N. Michel and P. F. Gardiner 732

Development of hypertension in rats during chronic exposure to cold
M. J. Fregly, D. C. Kikta, R. M. Threatte, J. L. Torres, and C. C. Barney 741

Preferential fatigue of the rib cage muscles during inspiratory resistive loaded ventilation
M. B. Hershenson, Y. Kikuchi, G. E. Tzelepis, and F. D. McCool 750

Influence of muscle activity on the elastance of the upper airway of rabbits
L. G. Olson, L. G. Ulmer, and N. A. Saunders 755

Pressure-volume properties of the upper airway of rabbits
L. G. Olson, L. G. Ulmer, and N. A. Saunders 759

Effect of epithelium on mucus secretion from feline tracheal submucosal glands
T. Sasaki, S. Shimura, H. Sasaki, and T. Takishima 764

Regionalized adaptations and muscle fiber proliferation in stretch-induced enlargement
S. E. Alway, P. K. Winchester, M. E. Davis, and W. J. Gonyea 771

Chemoreflex blunting of hypoxic pulmonary vasoconstriction is vagally mediated
L. B. Wilson and M. G. Levitzky 782

Antigravity suit inflation: kidney function and cardiovascular and hormonal responses in men
G. Geelen, S. E. Kravik, A. Hadj-Aissa, G. Leftheriotis, M. Vincent, C.-A. Bizollon, C. W. Sem-Jacobsen, J. E. Greenleaf, and C. Gharib 792

Diastolic pressure determines autonomic responses to pressure perturbation in humans
J. S. Sanders and D. W. Ferguson 800

Combined effects of female hormones and metabolic rate on ventilatory drives in women
J. G. Regensteiner, W. D. Woodard, D. D. Hagerman, J. V. Weil, C. K. Pickett, P. R. Bender, and L. G. Moore 808

Validity of bioelectric impedance for body composition assessment in children
L. B. Houtkooper, T. G. Lohman, S. B. Going, and M. C. Hall 814

Cyclooxygenase blockers inhibit ethanol-induced pulmonary vasoconstriction in lambs
W. H. Drummond and R. L. Carter 822

Effect of sleep and circadian cycle on sleep period energy expenditure
G. Fraser, J. Trinder, I. M. Colrain, and I. Montgomery 830

Increased hemoglobin O_2 affinity does not improve O_2 consumption in hypoxemia
G. Gutierrez and J. M. Andry 837

Regional pulmonary transit times in humans
W. MacNee, B. A. Martin, B. R. Wiggs, A. S. Belzberg, and J. C. Hogg 844

Attenuation of hypoxic ventilation by hyperbaric O_2: effects of pressure and exposure time
I. Liberzon, R. Arieli, and D. Kerem 851

Pulmonary and ventilatory responses to pregnancy, immersion, and exercise
M. J. Berry, R. G. McMurray, and V. L. Katz 857

Effect of increased afterload on right ventricular function in newborn pigs
J. Belik and R. B. Light 863

Diaphragm length adjustments with body position changes in the awake dog
J. W. Fitting, P. A. Easton, R. Arnoux, A. Guerraty, and A. Grassino 870

Effect of exercise on insulin action in human skeletal muscle
E. A. Richter, K. J. Mikines, H. Galbo, and B. Kiens 876

High-frequency oscillations within early and late phases of the phrenic neurogram
C. L. Webber, Jr. 886

Hyperoxia and moderate hypoxia fail to affect inspiratory muscle fatigue in humans
B. T. Ameredes and T. L. Clanton 894

P1 and P2 purinergic receptor signal transduction in rat type II pneumocytes
D. Warburton, S. Buckley, and L. Cosico 901

New evidence for active sodium transport from fluid-filled rat lungs
R. M. Effros, G. R. Mason, J. Hukkanen, and P. Silverman 906

Acute and chronic hypoxic pulmonary hypertension in guinea pigs
B. T. Thompson, P. M. Hassoun, R. L. Kradin, and C. A. Hales 920

Role of venoconstriction in thromboxane-induced pulmonary hypertension and edema in lambs
K. Yoshimura, M. L. Tod, K. G. Pier, and L. J. Rubin 929

Changes in breath $^{13}CO_2/^{12}CO_2$ consequent to exercise and hypoxia
T. J. Barstow, D. M. Cooper, S. Epstein, and K. Wasserman 936

Relationship between respiratory muscle function and age, sex, and other factors
H.-I. Chen and C.-S. Kuo 943

Physiological factors associated with the lower maximal oxygen consumption of master runners
A. M. Rivera, A. E. Pels III, S. P. Sady, M. A. Sady, E. M. Cullinane, and P. D. Thompson 949

Enhanced airway responses to substance P after repeated challenge in guinea pigs
S. A. Shore and J. M. Drazen 955

Elastic characteristics of the airway wall
J. M. Fouke, A. D. Wolin, K. P. Strohl, and G. M. Galbraith 962

Effects of tension, duty cycle, and arterial pressure on diaphragmatic blood flow in dogs
S. N. A. Hussain, C. Roussos, and S. Magder 968

Effects of lung volume, volume history, and methacholine on lung tissue viscance
S. T. Kariya, L. M. Thompson, E. P. Ingenito, and R. H. Ingram, Jr. 977

Intracellular recordings of respiratory neurons in the lateral medulla of piglets
E. E. Lawson, D. W. Richter, and A. Bischoff 983

Rat lung glucose metabolism after 24 h of exposure to 100% oxygen
D. J. P. Bassett, E. Bowen-Kelly, and S. S. Reichenbaugh 989

SPECIAL COMMUNICATIONS

Pitfalls of venous occlusion method for determination of capillary pressure in humans
B. Braam, H. A. Koomans, T. J. Rabelink, and R. Berckmans 997

A. B. H. Crawford, D. J. Cotton, M. Paiva, and L. A. Engel 2502

Effect of airway closure on ventilation distribution
A. B. H. Crawford, D. J. Cotton, M. Paiva, and L. A. Engel 2511

Effect of rehydration on atrial natriuretic peptide release during exercise in the heat
M. Follenius, V. Candas, B. Bothorel, and G. Brandenberger 2516

Effects of unilateral nasal occlusion on ventilation and pulmonary resistance in infants
R. J. Martin, M. J. Miller, B. Siner, J. M. DiFiore, and W. A. Carlo 2522

Effect of magnesium sulfate on bronchoconstriction in the lung periphery
K. S. Lindeman, C. A. Hirshman, and A. N. Freed 2527

Electromechanical coupling of ferret airway smooth muscle in response to leukotriene C_4
C. G. Murlas and C. A. Doupnik 2533

Diaphragm motor unit recruitment during ventilatory and nonventilatory behaviors
G. C. Sieck and M. Fournier 2539

Tolerance to low-dose endotoxin in awake sheep
R. I. Whyte, H. S. Warren, E. Greene, M. L. Glennon, D. R. Robinson, and W. M. Zapol 2546

Critical O_2 delivery to skeletal muscle at high and low P_{O_2} in endotoxemic dogs
D. L. Bredle, R. W. Samsel, P. T. Schumacker, and S. M. Cain 2553

Dynamic response of local pulmonary blood flow to alveolar gas tensions: experiment
L. J. Paradowski and B. J. B. Grant 2559

CSF acidosis augments ventilation through cholinergic mechanisms
M. D. Burton, D. C. Johnson, and H. Kazemi 2565

Inspiratory muscle interaction in the generation of changes in airway pressure
A. F. DiMarco, G. S. Supinski, and K. Budzinska 2573

Effects of progressive hypoxia on parasternal, costal, and crural diaphragm activation
G. B. Darian, A. F. DiMarco, S. G. Kelsen, G. S. Supinski, and S. B. Gottfried 2579

Effects of posture on the venodilatory response to nitroglycerin
J. A. Gascho, C. Fanelli, A. Sumner, and R. Zelis 2585

Cardiovascular responses of 70- to 79-yr-old men and women to exercise training
J. M. Hagberg, J. E. Graves, M. Limacher, D. R. Woods, S. H. Leggett, C. Cononie, J. J. Gruber, and M. L. Pollock 2589

Hyaluronan affects extravascular water in lungs of unanesthetized rabbits
J. Bhattacharya, T. Cruz, S. Bhattacharya, and B. A. Bray 2595

CONTENTS OF VOLUME 66

Lung expansion and the perialveolar interstitial pressure gradient
J. Bhattacharya, M. A. Gropper, and J. M. Shepard 2600

M wave potentiation during and after muscle activity
A. Hicks, J. Fenton, S. Garner, and A. J. McComas 2606

Effects of starvation and refeeding on elastase-induced emphysema
H. Sahebjami and M. Domino 2611

Plasma protein binding and endothelial enzyme interactions in the lung
J. H. Linehan, C. A. Dawson, R. D. Bongard, T. A. Bronikowski, and D. L. Roerig 2617

Effect of PAF on parasympathetic contraction of canine airways
R. A. Bethel, S. P. Curtis, D. C. Lien, C. G. Irvin, G. S. Worthen, A. R. Leff, and P. M. Henson 2629

Skeletal muscle glucose transport in obese Zucker rats after exercise training
J. L. Ivy, J. T. Brozinick, Jr., C. E. Torgan, and G. M. Kastello 2635

Inhibitory effects of CO_2 on airway defensive reflexes in enflurane-anesthetized humans
T. Nishino, K. Hiraga, and Y. Honda 2642

Inhibition of neutral endopeptidase potentiates neurogenic inflammation in the rat trachea
E. Umeno, J. A. Nadel, H.-T. Huang, and D. M. McDonald 2647

Neutral endopeptidase and neurogenic inflammation in rats with respiratory infections
D. B. Borson, J. J. Brokaw, K. Sekizawa, D. M. McDonald, and J. A. Nadel 2653

Sequence of interstitial liquid accumulation in liquid-inflated sheep lung lobes
R. L. Conhaim, S. J. Lai-Fook, and A. Eaton 2659

Importance of vasoconstriction in lipid mediator-induced pulmonary edema
A. Sakai, S.-W. Chang, and N. F. Voelkel 2667

Propagation of stress waves in inflated sheep lungs
M. Jahed, S. J. Lai-Fook, P. K. Bhagat, and S. S. Kraman 2675

Mechanisms of hypotension produced by platelet-activating factor
F. R. M. Laurindo, R. E. Goldstein, N. J. Davenport, D. Ezra, and G. Z. Feuerstein 2681

Development of chronic airway hyperresponsiveness in ragweed-sensitized dogs
A. B. Becker, J. Hershkovich, F. E. R. Simons, K. J. Simons, M. K. Lilley, and M. W. Kepron 2691

Halothane decreases both tissue and airway resistances in excised canine lungs
J. Vettermann, D. O. Warner, J.-F. Brichant, and K. Rehder 2698

Perfused bronchial segment and bronchial strip: narrowing vs. isometric force by mediators
H. W. Mitchell, K. E. Willet, and M. P. Sparrow 2704

Threshold for muscle lactate accumulation during progressive exercise
J. Chwalbinska-Moneta, R. A. Robergs, D. L. Costill, and W. J. Fink 2710

CK and LD isozymes in human single muscle fibers in trained athletes
F. S. Apple and P. A. Tesch 2717

Static contraction increases arachidonic acid levels in gastrocnemius muscles of cats
D. M. Rotto, K. D. Massey, K. P. Burton, and M. P. Kaufman 2721

Contractile adaptations in the human triceps surae after isometric exercise
S. E. Alway, J. D. MacDougall, and D. G. Sale 2725

Increased exercise Sa_{O_2} independent of ventilatory acclimatization at 4,300 m
P. R. Bender, R. E. McCullough, R. G. McCullough, S.-Y. Huang, P. D. Wagner, A. Cymerman, A. J. Hamilton, and J. T. Reeves 2733

Contractile function of single muscle fibers after hindlimb suspension
P. R. Gardetto, J. M. Schluter, and R. H. Fitts 2739

Effect of change in particle number on pulmonary clearance of aerosolized ^{99m}Tc-DTPA
S. Groth, J. Mortensen, P. Lange, S. Vest, N. Rossing, and D. Swift 2750

0.35 ppm O_3 exposure induces hyperresponsiveness on 24-h reexposure to 0.20 ppm O_3
K. A. Brookes, W. C. Adams, and E. S. Schelegle 2756

Incorporation of arachidonic acid into lipids of the isolated perfused rat lung
F. H. Chilton, J. Y. Westcott, L. M. Zapp, J. E. Henson, and N. F. Voelkel 2763

Albumin absorption by canine bronchial epithelium
L. G. Johnson, P. W. Cheng, and R. C. Boucher 2772

Sympathetic nerve activity in arm and leg muscles during lower body negative pressure in humans
R. F. Rea and B. G. Wallin 2778

Glycogen supercompensation in rat soleus muscle during recovery from nonweight bearing
E. J. Henriksen, C. R. Kirby, and M. E. Tischler 2782

Longitudinal distribution of canine respiratory heat and water exchanges
D. W. Ray, E. P. Ingenito, M. Strek, P. T. Schumacker, and J. Solway 2788

Effect of saline infusion on body temperature and endurance during heavy exercise
A. Deschamps, R. D. Levy, M. G. Cosio, E. B. Marliss, and S. Magder 2799

Exercise training attenuates the myocardial dysfunction induced by endotoxin
P. M. C. DeBlieux, K. H. McDonough, R. W. Barbee, and R. E. Shepherd 2805

Glycogenesis in muscle and liver during exercise
C. A. Hutber and A. Bonen 2811

Mixed and obstructive apneas are related to ventilatory oscillations in premature infants
T. B. Waggener, I. D. Frantz III, B. A. Cohlan, and A. R. Stark 2818

Regional cerebral blood flow response during and after acute asphyxia in newborn piglets
J. M. Goplerud, L. C. Wagerle, and M. Delivoria-Papadopoulos 2827

Clapping or percussion causes atelectasis in dogs and influences gas exchange
A. Zidulka, J. F. Chrome, D. W. Wight, S. Burnett, L. Bonnier, and R. Fraser 2833

Control of extrathoracic airway dynamics
E. L. Schultz and S. M. Horvath 2839

Peripheral effects of endurance training in young and old subjects
C. N. Meredith, W. R. Frontera, E. C. Fisher, V. A. Hughes, J. C. Herland, J. Edwards, and W. J. Evans 2844

Dietary protein requirements and body protein metabolism in endurance-trained men
C. N. Meredith, M. J. Zackin, W. R. Frontera, and W. J. Evans 2850

Exercise-induced focal skeletal muscle fiber degeneration and capillary morphology
F. M. Peeze Binkhorst, H. Kuipers, J. Heymans, P. M. Frederik, D. W. Slaaf, G.-J. Tangelder, and R. S. Reneman 2857

Oleic acid reduces pulmonary microvascular sieving capacity in sheep
L. Smith, S. Andreasson, S. Bergdahl, B. Rippe, and B. Risberg 2866

Amplification of airway constriction due to liquid filling of airway interstices
D. Yager, J. P. Butler, J. Bastacky, E. Israel, G. Smith, and J. M. Drazen 2873

Nisoldipine inhibits vasoconstrictor responses in the cat pulmonary vascular bed
P. J. Kadowitz, H. L. Lippton, J. A. Bellan, and A. L. Hyman 2885

Long-term consequences of compensatory lung growth
W. M. Thurlbeck and C. Langston 2891

SPECIAL COMMUNICATIONS

Anesthetic effects on liver and muscle glycogen concentrations: rest and postexercise
T. I. Musch, B. S. Warfel, R. L. Moore, and D. R. Larach 2895

Reproducibility of measurements of upper airway area by acoustic reflection
L. J. Brooks, P. J. Byard, J. M. Fouke, and K. P. Strohl 2901
